CONTINUATION OF SECTION RE: At least one error upon which reissue is based is described as follows:

Original Patent Claim 13 provides as follows:

A method of making an in-line skate comprising:  
providing a single piece of metal suitable for forming  
forming said piece of metal into a skate chassis having a top portion, a bottom portion and two sides extending in a length direction;  
forming a plurality of apertures in the bottom portion of the chassis along its length direction;  
coining a plurality of annular projections from said piece of metal in areas surrounding said apertures to form a plurality of spacers extending from each side of the chassis toward the opposite side of the chassis;  
rotatably mounting a plurality of wheels on axles extending through the apertures; and  
mounting footwear to the top portion of the chassis.

Patentee has the right to claim a process of making an in-line skate that does not require providing a single piece of metal from which a plurality of apertures and a chassis are formed.

the specification of which

☒ is attached hereto.

☐ was filed on \_\_\_\_\_ as reissue application number \_\_\_\_\_

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

Original Patent Claim 13 provides as follows:

A method of making an in-line skate comprising:  
providing a single piece of metal suitable for forming  
forming said piece of metal into a skate chassis having a top portion, a bottom portion and two sides extending in a length direction;
